Arkansas State Police

Thank you, I was telling Bryan yesterday how professional and friendly the entire MBF staff was to work with. My wife and I have built spec houses for the last 15 years so I know what kind of problems can occur. The quality of your construction coupled with the divisional leadership supported by every employee of the company leaves the customer with a strong sense of accomplishment at the end of the project verses working through a ton of issues that could easily occur with a complex design like this. Again our staff was really impressed with the workmanship! Capt. John Morrow

Freightliner M2-112 Walk through cab, 410HP, 54,000 lb.
